

After-Hours Care

If an employee is injured or needs an alcohol or drug screen after normal business hours, we can help.

Emergency Services

Our Emergency Department physicians and nurse practitioners can treat your injured employees when our occupational medicine clinics are closed. Our nurse liaison calls your designated company representative with a status report the next business day.

Drug and Alcohol Screenings

When you need post-accident, random and for-cause drug and alcohol screenings for an employee after hours, our accredited lab is open. A nurse coordinator phones and mails results to your designated company representative.

For these screenings, go directly to the Lab. Do not stop in the ED.

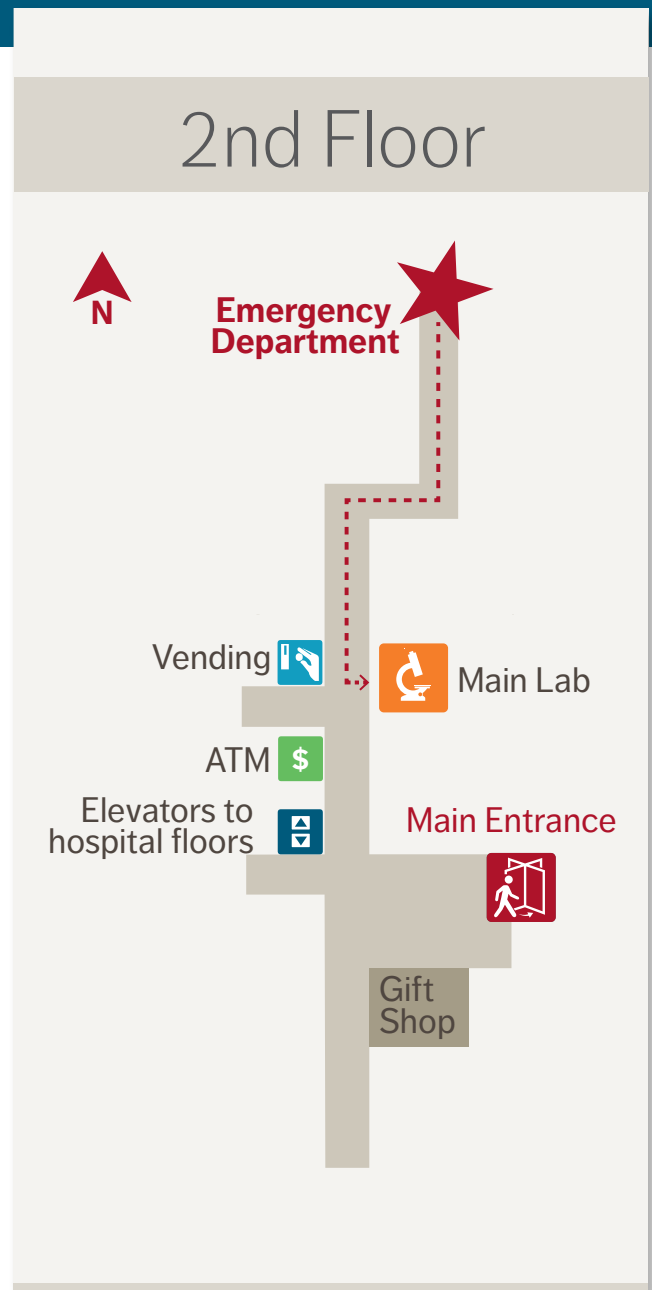

Directions

- Enter through the Emergency Department and walk through the waiting area.
- Follow the main hall to the lab (on left).
- Check in at the registration desk.

Please bring:

- Company name and billing address
- Name and contact information for person(s) who should receive the results
- Photo ID
- Authorization form
- Preprinted chain of custody forms, if you prefer

If you bring someone in for reasonable suspicion, please stay with them.
